The CycleOps System

The Power Is In You. And we're here to help you bring it out. At CycleOps, we realize at the heart of every cyclist is a better cyclist. A better athlete. A better and faster you. At some level, all of us have it: that extra something inside, that extra gear. Perhaps you've experienced it on the occasional, magical day, where you realized an unusual amount of strength or endurance. Or perhaps you've not yet made its acquaintance, or haven't had an encounter in some time. Either way, it's there, inside you. And chances are there's a lot more than you realize.

Our goal is to help you find that inner power. To help you maximize your potential. And our complete system of products is designed to allow you to do just this. From power meters to computers to education to software to indoor trainers and more. We're here to support you on any and all phases of your journey. A system is a sum greater than its individual parts, and the CycleOps System has you covered.

Athletes set goals, push boundaries, and strive to achieve. Whether you're training for your first century or your 20th Ironman, we all want to get the most out of ourselves. Cyclists, triathletes, pros and amateurs around the world all choose the CycleOps System to help achieve their goals. And for good reason. So keep your determination, motivation and focus, and together we can bring it out and reach new levels. The Power Is In You.

ALLOY WHEELSET

- CycleOps front and rear alloy wheels
- PowerTap G3 rear hub and CycleOps front hub
- 1,850 grams (complete G3 wheelset)
- Perfect for training in all conditions
- Includes skewers

46MM WHEELSET

- Full carbon clincher using high-quality hybrid 34 Msi and 42 Msi fiber and computer metered high-temperature resin system
- PowerTap G3 rear hub and CycleOps front hub
- 20 hole front, radial
- 24 hole rear, 2x
- DT Swiss Competition spokes
- 1,650grams
- Includes skewers & Cryo-Blue brake pads
- Rims manufactured by Reynolds

45MM ENVE WHEELSET

- 45mm deep section, hand-built carbon clincher and tubular versions
- PowerTap G3 rear hub and CycleOps front hub
- 24-hole rear/20-hole front DT Swiss Aerolite spokes
- 1,250/1,540 grams (tubular/clincher wheelsets)
- Includes skewers and carbon-specific brake pads
- Perfect for training and racing in all conditions
- Rims manufactured by Enve Composites

65MM ENVE WHEELSET

- 65mm deep section, hand-built carbon clincher and tubular versions
- PowerTap G3 rear hub and CycleOps front hub
- 24-hole rear/20-hole front DT Swiss Aerolite spokes
- 1,365/1,625 grams (tubular/clincher wheelsets)
- Includes skewers and carbon-specific brake pads
- Perfect for training and racing in all conditions
- Rims manufactured by Enve Composites

3.4 ENVE SES WHEELSET

- 35mm front/45mm rear hand-built carbon clincher or tubular wheelset
- PowerTap G3 rear hub and CycleOps front hub
- DT Swiss Aerolite spokes
- 1,540 grams clincher wheelset
- Predictable and linear response in all wind conditions - the ideal handling and aero wheel
- Highest strength to weight ratio in the industry.
- Proprietary molded in spoke hole technology.
- Textured braking surface allowing for a more positive engagement and better braking in wet conditions.

6.7 ENVE SES WHEELSET

- 60mm front/70mm rear hand-built carbon clincher or tubular wheelset
- PowerTap G3 rear hub/CycleOps front hub
- DT Swiss Aerolite spokes
- 1,625 grams clincher wheelset
- Predictable and linear response in all wind conditions- the ideal handling and aero wheel
- Highest strength to weight ratio in the industry.
- Proprietary molded in spoke hole technology.
- Textured braking surface allowing for a more positive engagement and better braking in wet conditions.

POWERBEAM PRO

- Closed loop resistance control allows you to target and lock in exact power output, training zones and slope
- PowerTap technology provides +/- 5% accurate power measurement for precise feedback
- ANT+ wireless technology makes set up and transport easy
- PowerTuned flywheel optimizes inertial effect with limited dead weight for smooth, real-world feel
- PowerAgent's workout creator allows precise control over your training
- Virtual traning included
- Joule GPS included in model #9476

SUPERMAGNETO PRO

- Power curve for every rider type and ride type in one trainer
- Flexible Power Curve Technology lets you adjust resistance curves, providing the right inertia for the right rider
- PowerTuned technology provides smooth realistic accelerations and inertia for real-world feel
- Easier transport without sacrificing ride feel or inertia

JETFLUID PRO

- PowerTuned technology provides smooth, realistic accelerations and inertia offering real-world feel for widest range of riders and riding types
- Cooler operating temperature delivers long-lasting performance and stable progressive power curve
- Smooth, quiet and realistic resistance
- Consistent resistance throughout the entire ride regardless of ride type

FLUID^2

- PowerTuned technology that offers the widest resistance range and excellent balance of inertia with real-world feel.
- A large precision-balanced flywheel, including patented fan design, keeps the unit performing better longer.
- Realrides Race Day DVD included.

MAGNETO

- Precision-balanced zinc alloy flywheel features magneto technology.
- Push harder on the pedals and resistance increases from easy spin to simulating a lung-searing climb.
- Realrides Race Day DVD included.

MAG+/MAG

- Redesigned five-position varied resistance adjustment makes it easy to vary your workouts.
- Mag+ comes with a handlebar-mounted shifter.
- Realrides Race Day DVD included.

WIND

- As you change gears or boost leg speed, resistance increases.
- The vortex blade design generates progressive resistance.
- Die cast zinc blades double as a heavy flywheel for fluid starts and stops.
- Realrides Race Day DVD included.

POWERCAL

- The world's first-ever power meter translated from heart rate
- Display watts without replacing components on your bicycle
- Real world and in real time data
- Easy to install, set-up and maintain
- Multisport functionality: use same unit of measure across training activities
- ANT+ compatible: pair with Joule/Joule GPS or any ANT+ compatible display
- Speed/cadence sensor included in model #7151

POWERTAP G3

- World's lightest power meter
- Hub weighs a mere 325 grams
- Wider flanges for a stiffer overall wheel
- Smaller overall hub profile
- New field-serviceable electronics
- 15 mm alloy axle for optimum stiffness to weight ratio
- ANT+ compatible for use with Joule or your favorite computer
- Available in 20, 24, 28 and 32 spoke options (Shimano/SRAM or Campagnolo)

POWERTAP G3C

- All the features of the PowerTap G3 but with ceramic bearings
- Ceramic bearings by Ceramic Speed
- Hub weighs a mere 315 grams
- ANT+ compatible for use with Joule or your favorite computer
- Available in 20, 24, 28 and 32 spoke options (Shimano/SRAM or Campagnolo)

POWERTAP PRO MTB DISC

- Alloy axle for optimum stiffness to weight ratio
- ANT+ compatible for use with Joule or your favorite computer
- Available in 32 spoke options (Shimano/SRAM)

POWERTAP FRONT HUB

- Available in 20, 24, 28, and 32 Hole.
- Weight: 97g
- Aluminum Shell
- Alloy Lock Nuts
- Note: The CycleOps Front Hub is not a power-measuring device

JOULE

- Specifically designed for cyclists who train with power
- New and improved design and functionality
- Training simplified: intuitive to use and easy to analyze data
- Customizable dashboard: see exactly what you want, when you want
- Historical reporting: know where you've been and where you're going
- Includes downloadable power, altitude, TSS, normalized power and other critical training data

JOULE GPS

- Specifically designed for cyclists who train with power
- Integrated GPS puts your training on the map
- Small, sleek and redesigned body
- Customizable dashboard: 35 individual metrics from which to choose
- Intuitive to use and easy to analyze data
- Historical reporting: know where you've been and where you're going
- Includes downloadable power, altitude, TSS, normalized power and other critical training data

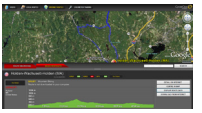
POWERAGENT

- Full ride download and analysis capability from PowerTap and indoor cycles
- Workout creator for the PowerBeam trainer and 400 Pro indoor cycle
- Ability to import .tcx files from other devices, like Garmin
- Create your own intervals and detailed interval analysis
- Automatically replicate your outdoor ride on PowerBeam trainers and 400 Pro indoor cycles
- Allows rides to be analyzed for peak power, heart rate, cadence, speed , altitude, temperature and detailed variable correlations
- Capability to upload power files directly to Twitter, 2Peak or TrainingPeaks
- PC and Mac compatible

View a detailed summary of each of your rides on PC or Mac.

VIRTUAL TRAINING

- Bring the outdoors inside with virtual route mapping and synchronized video
- Route creation with Google Earth™
- Route sharing via public routes database
- Ride and race against friends on the same virtual course
- Maximize efficiency and time training
- Compatible with CycleOps 400 Pro indoor cycle and PowerBeam Pro trainer



400PRO

- Duplicate the demands of a race or ride
- Control target power, slope or gearing with dedicated resistance control
- PowerTap technology provides +/-1.5% accurate power feedback
- Four points of micro adjustment to duplicate the fit of your outdoor bike.

Joule 3.0 Included

300PRO

- Joule 2.0 offers three modes of performance training: dashboard, reports and activities.
- PowerTap technology provides +/-1.5% accurate power feedback to take the guess work out of riding.
- Four points of micro adjustment to duplicate the fit of your outdoor bike.
- Precise resistance control lets you dial up the difficulty level for whatever intensity you can dish out.
- Freewheeling hub lets you stop pedaling and coast whenever your pace dictates to recover between efforts.

Joule 2.0 Included

200PRO

- Joule 2.0 offers three modes of performance training: dashboard, reports and activities
- Precise resistance control lets you dial up the difficulty level for whatever intensity you can dish out.
- Freewheeling hub lets you stop pedaling and coast whenever your pace dictates to recover between efforts.
- Stable platform for sprinting workouts or hill climbs.
- Dual capacity water bottle holder to keep you hydrated for the long haul.

Joule 2.0 Included

100PRO

- Four points of micro adjustment to duplicate the fit of your outdoor bike.
- Precise resistance control lets you dial up the difficulty level for whatever intensity you can dish out.
- Freewheeling hub lets you stop pedaling and coast whenever your pace dictates to recover between efforts.
- Stable platform for sprinting workouts or hill climbs.
- Dual capacity water bottle holder to keep you hydrated for the long haul.
